## REDUCING THE RISKS WITH DUPONT CHEMICAL PROTECTIVE CLOTHING

**DUPONT DEVELOPED CHEMICAL PROTECTIVE CLOTHING TO HELP SAFEGUARD MEN AND WOMEN FROM CHEMICAL HAZARDS THAT CAN AND CAN'T BE SEEN, SUCH AS DANGEROUS VAPORS, LIQUIDS AND PARTICLES.**

Whether the job is performing asbestos abatement, applying insulation, or handling industrial chemicals, DuPont understands the risks. That's why we've developed chemical protective clothing engineered from Tyvek® and Tychem®. Protection is built into the fabric itself; there are no films or laminates to abrade or wear away. They are made to help reduce workers from chemical exposure while performing their jobs. And for a better fit, Tyvek® and Tychem® garments with comfort fit design have been engineered for enhanced worker range of motion and durability in use.
