DuPont[™] Nomex[®] 910 Engineered Cellulose Paper

Preliminary Technical Data Sheet

Insulation Papers for the 21st Century

Construction

DuPont^{**} Nomex^{*} 910 is a unique insulating material comprised of high quality electrical grade cellulose pulp and web-like binders made from the same high temperature polymer as other Nomex^{*} brand papers. Because the product is comprised of both cellulose and Nomex^{*} aramid ingredients, it exhibits properties that are between Nomex^{*} Type 410 and cellulosic papers. Nomex^{*} 910 is currently offered in four thicknesses (0.08, 0.13, 0.18 and 0.25 mm [3, 5, 7 and 10 mil]). Additional grades of this new product may be offered in the future.

Applications

Nomex* 910 was developed as interlayer insulation in liquid-immersed transformers for distribution and small power transformers. It may also be used for wire-wrapping (conductor insulation) in any transformer, including large power transformers.

Properties

Nomex* 910 has improved physical and electrical properties over existing cellulose-only papers. Based on aging data, it also has longer life under standard thermal conditions. Cellulose (kraft) and TUK (thermally upgraded kraft) are well known as the incumbent insulation materials in liquid-immersed applications. Nomex* 910 is being compared to TUK since it is more thermally stable than standard kraft. The typical mechanical and electrical properties of Nomex* 910 are listed in Tables 1-2-3.

Table 1. Typical Mechanical Properties for DuPont" Nomex* 910								
Property	Units		Test Method					
		0.08 (3)	0.13 (5)	0.18 (7)	0.25 (10)			
Typical Thickness	mm mil	0.08 3.2	0.13 5.1	0.18 7.1	0.25 10.1	ASTM D646		
Basis Weight	g/m² opsy	80 2.3	125 3.7	160 4.8	230 6.8	ASTM D646		
Apparent Density	g/cc	0.8-1.0	0.8-1.0	0.8-1.0	0.8-1.0	ASTM D646		
Burst Strength	N/cm² lbf/in²	27 40	45 65	62 90	70 104	ASTM D828		
Tensile Strength, MD	N/cm lbf/in	70 40	110 65	175 100	190 110			
Tensile Strength, XD	N/cm lbf/in	17 10	25 15	42 25	70 40	ASTM D828		
Elongation, MD Elongation, XD	%	2.2 6.9	2.5 8.7	2.8 9.5	2.5 6.0	ASTM D828		
Tear Strength, MD	N gf	0.45 45	0.8 80	1.2 120	1.6 160			
Tear Strength, XD	N gf	0.70 70	1.2 120	2.0 200	2.0 200	IAPPI 414		

MD = Machine Direction, XD = Cross Machine Direction

Table 2. Typical Electrical Properties of DuPont" Nomex® 910 in Mineral Oil								
Property	Units	Product Thickness - mm (mil) Test Met				Test Method		
		0.08 (3)	0.13 (5)	0.18 (7)	0.25 (10)			
AC Rapid Rise Breakdown	kV/mm V/mil	87 2200	83 2100	75 1900	60 1500	ASTM D149		
Dielectric Constant at 60Hz @23 °C		3.2	3.4	3.3	3.3	ASTM D150		
Dissipation Factor at 60Hz @23 °C	%	0.9	1.0	1.0	1.0	ASTM D150		

Table 3. Typical Electrical Properties of DuPont" Nomex* 910 in Ester Liquid

Property	Units	Product Thickness - mm (mil)			Test Method			
		0.08 (3)	0.13 (5)	0.18 (7)	0.25 (10)			
AC Rapid Rise Breakdown	kV/mm V/mil	87 2200	87 2200	80 2000	63 1600	ASTM D149		
Dielectric Constant at 60Hz @23 °C		4.2	4.3	4.4	4.3	ASTM D150		
Dissipation Factor at 60Hz @23 °C	%	0.9	1.0	1.1	0.9	ASTM D150		

Dielectric Strength of Multiple Layers

Testing multiple layers in mineral oil per ASTM D149 indicates that DuPontTM Nomex^{*} 910 offers an increase in AC rapid rise breakdown voltage compared to TUK. These results can be seen in Figure 1.

Thermal Aging

Long-term thermal aging tests in sealed tubes were conducted in our laboratories using procedures outlined in the IEEE Standard for Thermal Aging (IEEE C57.100^{°°} - 2011).

Based on long-term testing in mineral oil: Nomex[®] 910 - Thermal Class 130

Based on long-term testing in ester liquid: Nomex[®] 910 - Thermal Class 140

Nomex[®] 910 Engineered Cellulose Paper

Product safety information is available upon request. This information corresponds to our current knowledge on the subject. It is offered solely to provide possible suggestions for your own experimentation. It is not intended, however, to substitute for any testing you may need to conduct to determine for yourself the suitability of our products for your particular purposes. This information may be subject to revision as new knowledge and experimence become available. Since we cannot anticipate all variations in actual end-use conditions, **DuPont makes no warranties and assumes no liability whatsoever in connection with any use of this information**.
